### Experience

#### LGS – IBM – BELL

Senior Full Stack Developer | Canada | April 2025 – Present

Front End Developer | Canada | January 2022 – March 2025

- Designed and implemented key front-end features for Bell’s e-commerce website using **React.js**, improving the website's performance and responsiveness by optimizing components and reducing load times by 20%.
- Refactored legacy code by introducing **Redux Toolkit** for state management, simplifying complex workflows and reducing code redundancy across multiple components.
- Led the integration of **RESTful APIs** with the front end, ensuring seamless data flow and improving the efficiency of product filtering, cart management, and checkout functions.
- Enhanced website performance by implementing **lazy loading**, **code splitting**, and **Tailwind CSS classes**, significantly improving **Core Web Vitals** metrics for SEO and user experience.
- Collaborated directly with the QA team to implement automated tests using **Jest** and **Cypress**, reducing production bugs by 30% and improving release cycles through continuous testing and feedback.

#### ENRAGE TECH – MULTIPLE CLIENTS

Front End Developer | India | Jun 2015 – Sep 2018

- Developed responsive web pages using **HTML, CSS, and JavaScript**, ensuring compatibility across different browsers and devices to improve user experience.
- Built reusable components using **React.js** to streamline the development process and reduce repetitive code across multiple pages in the project.
- Collaborated with back-end developers to integrate **RESTful APIs**, ensuring seamless data flow and dynamic content rendering on the front end.
- Fixed front-end bugs and optimized **UI performance**, improving page load times by identifying and addressing inefficient code and unused assets.
